ABOUT

SlipStop 100 is a clear matt textured lamination film suitable for indoor use. Being a polypropylene, it is an economical and environmentally friendly alternative to PVC films. The SlipStop 100 offers a permanent acrylic adhesive, formulated to give exceptional clarity and bond strength. The adhesive will perform impeccably on most common printing inks. In order to achieve a perfect result, we recommend combining this lamination film with the [40.100N | StrongTack](#) (permanent) or [51.101N | StrongTouch](#) (removable) print film.
