## ABOUT

The Trigger Spray has been specially designed for cleaning and signage professionals. The 0,5-liter bottle has a clear scale on the side so that the liquid can be dosed precisely. With the adaptable spray head, you can set a tight jet or fine mist. What sets the Trigger Spray apart is that the spray releases liquid both when squeezing and when releasing the trigger. This way you can spray twice as fast while putting a lot less strain on your fingers and hands.
