

Total Blackboard marker compatibility

TOTAL TOOLS | Accessories

Features

Generally, any blackboard marker will work on our Total Blackboard product, but it is recommended to do a test if your blackboard marker is not included on our list below of tested markers.

Following list will give you the compatible markers that were tested by iSee2. The tests carried out ensure that the markers have an **excellent wipe off with a wet towel** (and some soap if necessary), without leaving any trace. The markers' wipe off ratio was tested for <24h, 48h, 1 week and 1 month. The below markers are suitable for our Total Blackboard product.

iSee2 has a blackboard marker available in the Total Tools range: [97.010 | Blackboard Marker White](#). Ask for more information at info@iSee2.eu
